

Cybersecurity Advisory Services

*Guiding Client leadership along the
Cybersecurity Maturity Compendium*

Cybersecurity Professionals with Cyber Maturity Focus

No matter where your business is along the Cybersecurity Maturity Compendium, our certified security specialists can help you improve - and sustain - your cybersecurity capabilities.

Cybersecurity and Governance

Tone at the top: executive management is ultimately responsible for Cybersecurity. Establishing a governance process, procedures and the right team is vital.

It's a process: Cybersecurity requires on-going maturity, monitoring and adaptability to current and future threats.

More than I.T.: Cybersecurity is as much behavioral as technical. Organization-wide education, policies and other controls can mitigate your risks.

We're here to help

SL Cybersecurity Maturity Path Services Include:

- Cyber maturity and risk assessments
- Info Sec governance committee development
- Design, publish and train: security policies, controls
- Remediation and deployment of internal controls
- Ongoing monitoring, response oversight, and governance
